Quality Assessment and Performance Improvement

Work Plan

FY 2019-2020

December 2019

Updated February 2020
Introduction

Ventura County Behavioral Health (VCBH), a department of the Ventura County Health Care Agency (HCA), provides a system of coordinated services to address the mental health and substance abuse treatment needs of Ventura County. The Department is committed to excellence through “best practices” and a consumer-driven and culturally competent approach to service delivery. VCBH staff are dedicated to reducing suffering and enhancing recovery from mental illness, alcohol, and/or other drug problems. VCBH believes that consumer and family member involvement is critical to meeting our commitment to excellence and for profound change in consumers’ lives. Therefore, VCBH is dedicated to integrating consumers and family members across the Department’s organization and activities.

The VCBH Quality Management Program is focused on the successful implementation of the mission, goals, and commitment of the Behavioral Health Department. The Quality Management Program is responsible for: quality improvement projects; performance outcome tracking and analyses; ensuring compliance with federal, state and contractual standards and Department policies; and ensuring overall quality in service delivery. The principles of wellness, recovery, resiliency, and cultural competency are embedded within and direct all Quality Management activities and projects.

The purpose of the annual Quality Assessment and Performance Improvement (QAPI) Work Plan is to provide a working document for the monitoring, implementation, and documentation of efforts to improve service delivery for both Mental Health and Substance Use Services programs and services from VCBH. The year-end evaluation of the QAPI describes progress towards overarching goals and highlights accomplishments for specific projects and activities. The year-end evaluation also supports development of the following year’s QAPI Work Plan.

It is important to note that early in 2019, organizational changes were made to create a broader VCBH Quality Management program that encompasses Quality Improvement and Quality Assurance work units. A description of the revised program is provided below. In addition, there have been efforts to align and combine work related to Mental Health and Substance Use Services, as evidenced by this QAPI reflecting goals for both.

Quality Management Program

The VCBH Quality Management Program (QM) is accountable to the VCBH Director and is responsible for reviewing the quality of behavioral health services provided to Medi-Cal beneficiaries and ensuring compliance with contract requirements and relevant Federal and State regulations. The QM program resides within the Administration Division and is overseen by the Administration Division Chief and Compliance Senior Manager.

The QM program consists of five units that work collaboratively to achieve the goals of the annual Quality Assessment and Performance Improvement Work Plan. The units, described in further detail below include: Quality Assurance, Quality Improvement, Medical Records, Training, and Pharmacist.
Quality Assurance (QA) – QA activities include monitoring compliance with contract requirements, Federal and State regulations, and Department policies and procedures. QA staff are responsible for policy and procedure development; utilization review (UR); inpatient and outpatient service authorization; documentation training; processing provider appeals and beneficiary grievances and appeals; provider credentialing; monitoring provider network adequacy; and ensuring the completion of Medi-Cal site certifications for all internal county programs and contracted providers. In the event that fraud, waste, or abuse are suspected or identified, QA staff make a report to the HCA Compliance Officer and assist with investigation activities, as needed, to identify procedures to prevent future incidents and resolve quality of care issues.

Quality Improvement (QI) – QI activities include the use of performance measures and outcome data to identify and prioritize areas of strength and areas for improvement. The QI unit prepares the annual Quality Assessment and Performance Improvement Work Plan (QAPI) after evaluating progress on the prior year’s QAPI goals. The QAPI includes current state, measurable goals and data which guide QM activities throughout the year. Additionally, QI staff led Performance Improvement Projects (PIPs), as well as the Quality Management Action Committee (QMAC), the multidisciplinary entity including community stakeholders and beneficiaries that makes policy and performance improvement recommendations. Other activities include collecting beneficiary/family satisfaction surveys, informing providers of the results, and evaluating beneficiary grievances, appeals and fair hearings at least annually to ensure that practices are in place to address any identified quality of care concerns.

Medical Records – The Medical Records unit is responsible for the maintenance and storage of medical records in compliance with the Health Insurance Portability and Accountability Act, 42 CFR Part 2 confidentiality safeguards, and State record retention requirements. Activities include processing requests for release of protected health information and responding to subpoenas.

Training – The Training unit is responsible for overseeing the Department’s mandatory staff training as well as providing opportunities for professional development. Training staff ensure that requirements are met to offer continuing education units to staff and contribute to overall workforce development.

Pharmacist – The Pharmacist is responsible for monitoring the safety and effectiveness of medication practices through activities including: providing medication consultation to prescribers, conducting medication room inspections, facilitating the Medication Monitoring Workgroup and serving as a liaison to county pharmacies.
Quality Management Action Committee (QMAC)

The purpose of the QMAC is to provide recommendations and oversight of Behavioral Health’s QAPI and other quality management activities. QMAC representation includes MHP practitioners, providers, consumers, and family members. The QMAC reviews, evaluates, and advises on results of QI/QM activities designed to improve the access, quality of care, and outcomes of the service delivery system.

The QMAC meets quarterly for an all member session for focused data review and guidance on process improvement efforts and quality of care areas of focus, such as, grievances/appeals, change of provider trends, access, satisfaction, and quality data. The QMAC also convenes ad hoc committees on a time-limited basis for focused discussion to support carrying out QAPI-related activities.

Performance Improvement Projects (PIPs)

VCBH conducts Performance Improvement Projects (PIPs) for both Mental Health and Substance Use Services. A PIP is a project designed to assess and improve service delivery and outcomes of care. For each division, there is one clinical and one non-clinical project. There is an ongoing cycle of developing, implementing, and analyzing project related data for the PIPs. The PIPs for FY 2019-20 are summarized as follows:

Non-Clinical

- Mental Health (Active) - Enhanced Access Performance Improvement Project. Goal: Improve timeliness from request for service to first service appointment to specialty mental health services for Medi-Cal beneficiaries in the predominantly Latino communities of Santa Paula, North Oxnard, and South Oxnard.

- Substance Use Services (Active) – Timeliness to First Assessment Performance Improvement Project. Goal: Improve time to service from request for service to assessment for SUS treatment programs for both urgent and routine service requests.

Clinical PIPs

- Mental Health (Concept) - Post-Hospitalization Case Management Performance Improvement Project. Goal: Enhance the services provided to specific consumers discharged from an inpatient psychiatric unit (IPU) to decrease the rate of 7 and 30-day readmissions.

- Substance Use Services (Active) – Post-Discharge Care Coordination Performance Improvement Project. Goal: Improve percentage of patients transitioning to levels of care after discharge from SUS residential treatment.
**Special Projects**

In FY 19-20, VCBH launched a number of pilot projects in the Mental Health division that employ various access models at outpatient clinics with the goal of improving timely access and client experience in the access process throughout the county.

**2019-2020 QAPI Goals and Objectives**

The Quality Assessment and Performance Improvement (QAPI) Work Plan goals for 2019-20 provide the framework for monitoring, implementing, and documenting of efforts to improve VCBH service delivery across the continuum of Mental Health (MH) and Substance Use Services (SUS) divisions.

These goals, and accompanying objectives, are embedded at the operational program level and address overarching priorities related to improving access, timeliness, quality of care, health equity, and acuity levels. The specific focus of the QAPI goal focus areas for FY 2019-2020 are as follows:

- Timely Access to Services
- Care Coordination
- Cultural and Linguistic Competence
- Contract Provider Information Workflow Improvement
- Beneficiary Outcomes and Satisfaction with Services
- Utilization Review of Overutilization of Services
- Grievances and Appeals
- Employee Engagement

Within each goal the objectives are noted and information on the division(s) it relates to, the measurement or metrics for monitoring progress or success, those involved with and responsible for the objective, and the planned steps or actions is detailed.

The creation and application of the goals and objectives is an ongoing and iterative process throughout the year that involves many leaders across VCBH, as well as stakeholder input.
I. Timely Access to Services

Goal: **Beneficiaries will have timely access to services.**

Figure 7a: Summary of CY 2019 MH and SUS Grievances

Grievances received from January 2019 to December 2019

During this time period, grievances were spread across providers, clinic sites, and the type of grievances.

- **# of Substance Use Disorder (SUD) Grievances: 7**
  - Top DMC Grievance by Type:
    - Quality of Care: 2 (28%)
    - Program Requirements: 2 (28%)

- **# of Mental Health Grievances: 54**
  - Top MH Grievance by Type:
    - Quality of Care: 26 (48%)
    - MH Other*: 18 (33%)
  - Grievance by Facility Type
    - Inpatient: 12
    - Outpatient: 42

*MH Other* is broken into the following subcategories: Change of Provider/Request, Lost Property, Operational. Other Grievance not listed above, Patient’s Rights, Peer Behavior, Physical environment, Second Opinion and N/A.

Total Grievances During Calendar Year: 61

Figure 7b: Summary of MH Grievance Themes

MH Grievance Themes

- Delayed response to request for help (8)
- Being treated in an insensitive/disrespectful manner (6)
- Family member(s) felt as if staff minimized client’s needs (4)
- Clinic/program did not provide sufficient care (4)
- Staff did not help client access needed benefits and/or services (3)

Additional Themes:
- Change of Provider/Request due to lack of progress in treatment (2)
- Felt unsafe in inpatient facility (2)
- Disrespect to family member(s) of clients (2)
- Psychiatrist did not provide sufficient care (2)
- Staff misrepresented their role (1)
- Psychiatrist provided an incorrect diagnosis (1)
- Lack of supervision in inpatient facility (1)
- Staff did not follow through on a promise made (1)
- Staff’s inconsistent attendance impacting service delivery (1)
- Staff was unprepared for counseling session (1)

Note: One grievance may have multiple “themes”. The counts are duplicated.
VIII. Employee Engagement

**Goal:** Enhance employee satisfaction by utilizing yearly Employee Engagement Survey findings to develop action steps.
